

Gulf of Carpentaria

We set out dawn to begin our trip
heading north towards the town of Tenterfield.
Where we would spend a few nights
And have a good look around
To explore the famous sights
We had some grub by the campfire
After we caught some fish
That they made a tender and delicious dish
The next morning, we set off again
Excited to be heading towards
Australia own Jurassic Park
Where we would explore the fossils
And the digs with ancient dinosaurs
Bones could be found
Including those that date
To 95 million years near Winton
To meet cooper a titanosaurs
Australia's largest dinosaur we would continue north towards the Gulf
With stops along the way
Where we camped out near the wetlands
And saw magnificent bird life
And sunsets that were grand
