

Eye See You Optometry is a mobile optometry service that brings high-quality, personalised eye care directly to aged care facilities.

Our comprehensive eye examinations are designed to ensure the visual well-being of residents by assessing visual acuity, eye health, and detecting common age-related conditions such as cataracts, glaucoma, and macular degeneration.

Our services include:

- **Bulk-Billed Eye Examinations:** A thorough check of the resident's vision and overall eye health, including tests for eye disease.
- **Prescription Eyewear:** If needed, we can provide a tailored prescription for glasses to improve vision and quality of life. We will contact you for consent prior to ordering any glasses or vision aids.
- **Eye Care Reports:** After each examination, we will provide a detailed eye care report outlining our findings to you and the clinical staff - including any conditions detected, recommended treatments or referrals, and suggested follow-up care.
- **Specialist Referrals:** If further treatment is required, we will refer the resident to trusted specialists and coordinate follow-up care.
- **Ongoing Monitoring:** We keep track of the resident's eye health over time, ensuring that changes in vision or new issues are promptly addressed.

With Eye See You Optometry, residents receive expert eye care in the comfort of their home, ensuring their vision is clear, healthy, and well-supported for the long term.

Please confirm below whether you consent to your loved one receiving our eye care services by returning a signed copy of this form:

Date: Resident Name:

Enduring Power of Attorney Name & Signature:

☐ Yes, I consent for the resident to be seen by Eye See You Optometry
