Award-winning care

About Creature Comforts

Creature Comforts is a Whiddon program focused on bringing more animals into aged care.

What are the benefits?

There is a wealth of evidence around the benefits of the companionship of pets and the greater purpose and meaningful activity that caring for animals can bring to an older person. In addition pets, and particularly dogs, are known to create stronger communities and social connections.

Our Creature Comforts program aims to partner with residents and their families to agree on the types of pets and animals that residents wish to have around them in the care home. Often residents take on responsibilities for these pets including dog walking, feeding and grooming.
